COOKING IN STYLE

Thanks to General Electric Co.'s line of custom range hoods, homeowners can personalize the heart of their home with individual style. The Monogram Custom Hood Insert can be embellished with such details as tile or wood panels. Offered in 30-, 36- and 48-inch configurations, the product features a removable control panel that can be mounted to a countertop or wall. To order, contact Westar Kitchen & Bath, (602) 271-0100.

NATURE-MADE

Craft-Art has carved out a niche in the kitchen countertop industry with its increasing use of reclaimed woods. The Antique Heart Pine countertop, one of the company's latest offerings, is made almost entirely from southern longleaf yellow pines that commonly were used to construct mills throughout the South. The straw-color wood features reddish-brown accents and often has knots or nail holes. Order this product at Courtyard Interior Design Studio, (480) 368-5430.
