Craft Art Adds Metal & Glass Countertops to Wood Product Offering *The company also now provides instant online quotes*

ATLANTA--Jan. 20, 2012—Craft Art, Inc. the leading wood countertop producer in North America, has added metal and glass countertops, to become the pioneering one-stop shop for specialty surfaces. The company also now provides instant online quotes to offer more specialty countertop choices, with a quicker turnaround than most competitors.

“People want countertops and islands in their homes that make statements,” says Sarah Anderson, Marketing Coordinator for Craft Art. “Both metal and glass countertops make a bold modern statement and are very hygienic surfaces with little maintenance.”

Metals offered by Craft Art are Stainless Steel, Copper, Pre-Weathered Zinc, and Bronze. Except for stainless steel, the metals will oxidize, forming a patina. On a green note, Copper and Zinc are recyclable.

Glass is available in more than 50 combinations from different textures to Craft Art’s “Exact Match” colored glass with LED backlighting options. One of the most stylish countertop materials available, glass provides a high-end unique look, offering clean lines and a cleaner surface.

Craft Art has built the first in a series of exclusive showrooms where customers, designers, and kitchen and bath dealers can view a niche surface showcase. “Homeowners want alternatives to traditional countertops, and our Buckhead (Atlanta) showroom is designed to merchandise a multitude of niche surfaces so people can conveniently select their ideal surface,” says Brad Baker, Director of Sales, Craft Art.

About Craft Art

Founded in 1998 and headquartered in Atlanta, GA, Craft Art is the industry leader of custom-built wood islands and countertops in North America. The company now has more than 25 different wood species, 50 glass combinations and four types of metal countertops, with a retail presence in nearly 3,000 locations.
